Sent: ven. 20/07/2018 14:52

Dear all,

Socfin has been informed of your report "Draw the line"; this report mentions a number of inaccurate issues; Socfin regrets that Friends of the Earth did not reach us to give us a preliminary right to answer.

We want to clearly state that:

- Bolloré Group is a minority shareholder of Socfin Group and none of the financing granted to Bolloré Group has been used by Socfin;
- The French justice has acknowledged that Socfin land grabbing allegations are defamatory and unfounded.

Socfin has developed, with TFT, a dashboard in order to increase Socfin's transparency and allow for managing any grievance or complaint anyone would like to raise against our Responsible Management Policy.

For the sake of transparency, we will publish this email on our transparency dashboard and invite you in the future to use the grievance procedure in place to raise any concern you may have on Socfin's operations with regards to the implementation of its Responsible Management Policy.

Best regards,
